
CS230 ASSIGNMENT 2

GOALS

- Practice writing pseudocode
- Define and use your own Java classes
- Work defining methods and parameter passing
- Practice using Java's String class.
- Practice using Java's Random class

ASSIGNMENT 2

- All of the tasks in this assignment have to be done `individually` (no collaboration)

You are asked to do the following exercises:

Individual Exercise 2.0: Write pseudocode ([?assign=206&part=1](#))

Individual Exercise 2.1: Reading the same L2R and R2L ([?assign=107&part=1](#))

Individual Exercise 2.2: Generate Random Passwords ([?assign=106&part=1](#))

LOGISTICS

- How to turn in your assignment ([?assign=0&part=1](#))
- For every task, include a file showing **testing of your solution**, e.g., the contents of the BlueJ Console demonstrating correct executions of your program on various sample data.
- Code should be carefully **commented**. Use top of the file comments, top of the method comments, as well as in-line comments as needed. Basic javadoc tags, like `@author`, `@param`, `@return`, are expected.
